Introduction to Regional Profiles

The following regional profiles offer a snapshot of selected indicators of child and family well-being for each of Vermont's 12 regions, which line up with the Agency of Human Services Districts. Each indicator represents the most high-quality, up-to-date data that is available at the regional level and includes comparison data when possible.

This report draws from multiple sources of Vermont data, not all of which use the same geographic boundaries. Several indicators are only available at the county or hospital service area level. When necessary, multiple areas are included to provide a more inclusive picture of the region.
